0 of 1 review helpful Encyclopedia of Meh By Stephen Mann This is basically a kid s book aimed at the under 15s I d guess I bought it as an RPG resource on someone else s suggestion The writing is not bad but it is very lightweight The various entries seem to blend into one another and the tone does not inspire me Obviously I am not a child and it is possible that a child would find this more satisfying 1992 1st edition hardcover Tight straight spine Honestly looking at this book it s hard to tell if it s ever been read Pages and boards in overall near mint condition a few light markings to outer pages edges Dustjacket in overall excellent condition some light surface edge impressions markings in spots light color fading to spine Jacket protected in brand new clear plastic brodart protective cover
