Beach Garden Club put out this book to give those who love gardening and creating a special tropical retreat in their own backyards. The photos are as colorful and luscious as the flowers it describes. This beautifully illustrated book offers everyone interested in tropical gardens a guide to the multitude of plants, trees, and exotic species that thrive in subtropical seaside conditions. Based on the hands-on experience of members of the Garden Club of Palm Beach, it includes chapters on palms, aroids, shrubs, dooryard fruit, flowering trees, herbs, orchids, roses, mangroves, and an essay on the history.
