1 of 1 review helpful Disappointed No new information By C Thomas I have the other garden books from Engebretson Trees Shrubs Perennials and Annuals so this book didn't have any new information. If you don't have any of the other books, this one is a good summary. Plus each of the other books is at least 300 pages long; this one is only 175 pages. I didn't realize that when I bought it or I would have figured. Includes habitat height and spread, plant features and flower colors, information on soil, light, and water, tips on how to best use the plant in your garden, recommended species for Minnesota and Wisconsin gardens. About the Author: DON ENGBRETSON is a University of Minnesota Master Gardener and award-winning garden writer who has been featured regularly on HGTV and has appeared on PBS TV's *HomeTime* program. He is the monthly garden columnist for a Minneapolis *St P*
